Use your **small change** to make a big **CHANGE** for **SMA**

**COIN AMNESTY**

Donate all your spare coins (and notes!) to help fund the new UK **SMA** Research Consortium, marking a step-change in UK **SMA** research.

This new collaboration of world-class research and clinical experts will help speed progress towards treatments and a cure for **Spinal Muscular Atrophy**.

Search all your pockets, drawers, handbags and purses for coins and notes, both big and small, to help raise the **£1.3 million** needed to fund the **UK SMA Research Consortium** for the next 3 years.

In its most severe form, **SMA** is the leading genetic killer of children under 2. It’s a progressive, neuromuscular condition that can affect walking, arm and hand movement, breathing and swallowing.
